

Our Mission

JS&T Solutions LLC and JS&T Tooling Concepts LLC provide customized consulting and services to inventors, entrepreneurs and small businesses. Our goal is to assist our clients in bringing ideas and new products to market for retail sale.

Our Vision

JS&T Solutions LLC and JS&T Tooling Concepts LLC specialize in consulting with clients to move their ideas successfully forward to the level the clients are seeking. Through flexible plans and regular communication, JS&T can customize services through each phase of the process.

“Inventors helping Inventors take products to market for a stronger America.”

What we do

➤ **Consulting**

JS&T will consult with clients on their idea and determine its feasibility. Consulting is an ongoing process of advising the client of different possibilities and options available.

➤ **Non-disclosure agreements**

Until the client's idea is protected, JS&T will not reveal any information to outside parties without the client's consent and a signed non-disclosure agreement.

➤ **Idea protection**

We consult with clients and teach them how to fill out and maintain invaluable documents such as inventor notebooks to protect their idea through the patent process.

➤ **Research**

JS&T will research the idea to ensure that it doesn't already exist and will be a safe option for consumers.

➤ **Patents**

With our expertise, we can recommend legal assistance when needed. We work with several patent and trademark attorneys.

What we can help with

➤ **Development**

This is the longest phase of the process and is dependent upon the complexity of the product idea. JS&T can help clients with:

- CAD drawings
- Prototypes
- Electronic demonstrations
- Testing

➤ **Manufacturing**

We will help with contacting potential manufacturers and with obtaining quotes. JS&T has contacts in the US, China and other regions.

➤ **Packaging**

JS&T Solutions LLC can assist with logo design and end-product packaging-including obtaining a UPC code for retail sales.

➤ **Marketing**

During this final phase, a market analysis is done to find companies for either retail or licensing of the product. We will assist in determining the best option for the product, set up an LLC to protect client assets, and help market your product.

➤ **Project status**

Throughout the entire process, JS&T will maintain project status sheets to help keep our clients aware of timelines and costs incurred. Either party can cancel services at any time. Refunds cannot be given on services or work already performed and completed.

Our Guiding Principles

- 🌍 To help improve US economy
- 🌍 To honestly serve our clients with the highest degree of integrity
- 🌍 To improve the world we live in by making new products available
- 🌍 To be thankful each day for all we have and are given

“Every Idea is Worth a Million Dollars!”
